DESCRIPTION

We are seeking a motivated and detail oriented professional to work with the wireless site design team in our Prairie du Sac office. The candidate will be involved in drafting and design of various projects ranging from rooftop antenna installations to new tower builds. In addition, the candidate must be capable of performing fieldwork and measurements independently. Experience with surveying and/or field measurements techniques, as well as construction inspection, would be beneficial. As a part of our team, you will work on projects across the Midwest ranging in size from single installations to a buildout involving several hundred projects. A minimum of a 2-year degree from an accredited Technical College with a focus on engineering or architecture is required. Experience specific to the telecommunications field is not required as training will be provided. To be successful in this role, you will need:

- The willingness to work hard with team members to meet client goals
- The ability to work collaboratively with other team members, officials, and clients;
- An engineering or site design background
- Experience with Microstation or AutoCAD, or a strong desire to learn these skills
- Working knowledge of basic computer skills (e.g. Microsoft Office)
